

ISO/IEC 42001 Are You Ready For The Future...

The ISO/IEC 42001:2023 standard provides comprehensive guidelines for the management of artificial intelligence (AI) systems within organizations. It covers various aspects including:

- Context of the Organization: Understanding both internal and external issues relevant to AI management.
- Leadership and Commitment: Emphasizing the role of top management in leading AI initiatives and integrating AI management system requirements into business processes.
- Planning: Addressing risks and opportunities related to AI, setting AI objectives, and planning changes.
- Support: Focusing on resources, competence, awareness, communication, and management of documented information.
- Operation: Outlining operational planning and control for AI systems.
- Performance Evaluation: Including monitoring, measurement, analysis, evaluation, internal audit, and management review.
- Improvement: Emphasizing continual improvement, addressing nonconformities, and taking corrective actions.
- The document also includes normative references, terms and definitions, and annexes providing additional guidance and controls for implementing AI management systems. This comprehensive approach aims to ensure responsible use and management of AI systems, considering their unique features and potential societal impacts.

This global standard specifies the requirements for establishing, implementing, and maintaining an Artificial Intelligence Management System. The goal is to help organizations and society benefit the most from AI while reassuring stakeholders that systems are being developed and used responsibly.

You can watch: **ISO/IEC 42001:2023 - Artificial Intelligence Management Systems - A First Look with PJR** on our YouTube channel, featuring ANAB Senior Manager of Accreditation, Management Systems, Brenda Bissell.

Join us for our next groundbreaking webinar “**What is ISO/IEC 42001 AI Management Systems?**” with industry expert Mel Blackmore, Managing Director of Blackmores (UK) Ltd. on Tuesday, March 5th. ♦

Stay Informed About The Transition To ISO 27001:2022

The latest version of the ISO 27001 standard has been released, and has been available for purchase on the ISO website since October 2022. While transition timelines are pending, the key changes primarily involve structural adjustments and slight modifications to Annex A, along with updates to terminology. Clients have until October 31, 2025, to transition, update their ISMS, and undergo recertification audits. New certifications to the 2013 version will be accepted until April 30, 2024. ISO 27001 serves as the benchmark for Information Security Management Systems, offering guidelines for risk assessment and security management. Certification demonstrates compliance with legal requirements and is valuable for organizations handling sensitive data, especially in healthcare, finance, public, and IT sectors. For more details and updates, visit the PJR website or join our next webinar: **What's New With ISO/IEC 27001:2022? - Tuesday, May 14, 2024.** ♦

Client Spotlight:

United Electronic Recycling, LLC

Pioneering Sustainable Electronics Solutions with Data Security at the Core

United Electronic Recycling, LLC (UER) is a Texas-based company that has been making waves in the electronic recycling and data security industry since its establishment in 2011. Headquartered in Coppell, Texas, the company is a prominent player in the field, offering a range of services that include electronic recycling, hard drive shredding, data security, IT asset disposition (ITAD), and paper destruction services.

UER distinguishes itself through its commitment to the highest standards, made evident in its certification under The Sustainable Electronics Reuse & Recycling (R2) Standard v3 and RIOS:2016. Multiple industries face the risk of data breaches, identity theft, and business fraud because of the presence of data on retired digital assets. These certifications confirm that UER is following the highest standard of processing to provide secure data destruction. Informing their customers that all data destruction processes are reviewed and validated by an independent party is an additional layer of security and peace of mind.

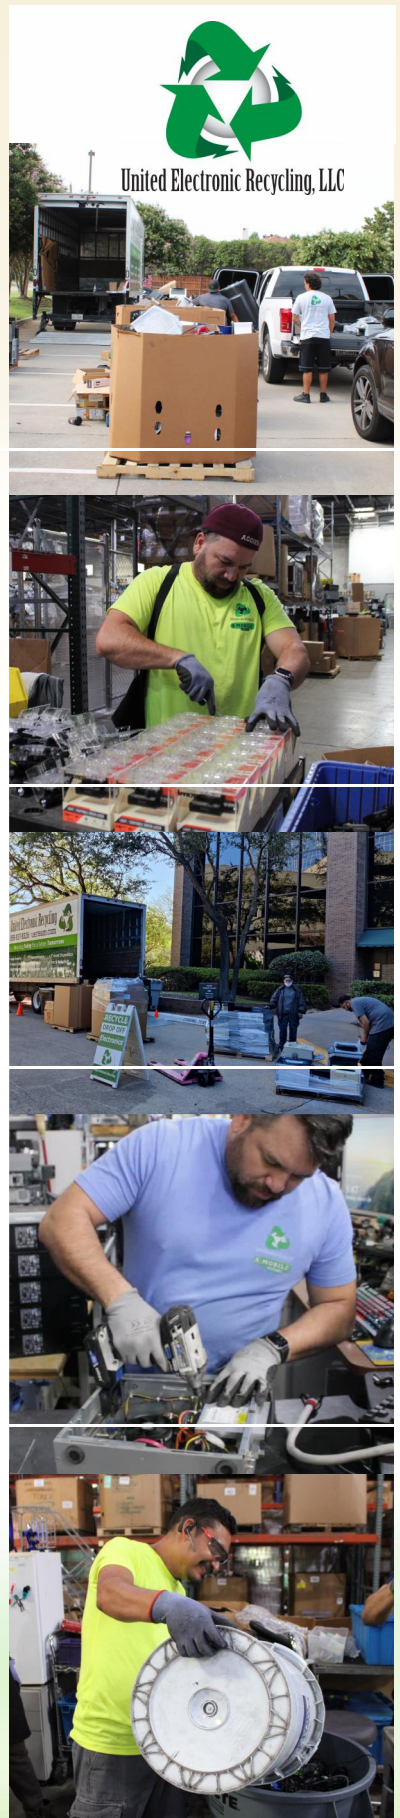

Certification is a critical factor in the company's success, setting it apart from competitors by offering clients guaranteed data security and destruction. United Electronic Recycling acknowledges the pivotal role played by Perry Johnson Registrars (PJR) in guiding them through the certification process. UER's Sales and Marketing Manager, Elizabeth Keller, stated, "Perry Johnson Registrars brought our ideas, goals, and standards together with the latest version of R2 certification and guided us into creating documented processes that are now a way of life for our company. We were truly happy with the attention we received during the entire process!"

At UER, they pride themselves on being a leading partner in the recycling industry. With over a decade of recycling experience, processing millions of pounds of electronics annually, UER is a trusted electronic waste service provider across the country. Their team of experts has 100+ years of collective industry experience supporting 5000+ collection events! They are passionate about serving their industry and have participated in many local and state level organizations such as The State of Texas Alliance for Recycling and Keep Texas Beautiful.

Looking ahead, United Electronic Recycling plans to continue expanding its recycling services while maintaining a focus on providing the highest level of service and cost-effective pricing. The company also owns and operates Mobile Shred IT, a division dedicated to document destruction and paper shredding services. The company is working towards achieving the NAID AAA Certification for its paper shredding process, reinforcing its commitment to offering the utmost security for its clients.

United Electronic Recycling's philosophy revolves around leading with sustainable practices, protecting environmental quality for future generations, and consistently exceeding industry standards. The company's motto, "Recycling Today for a Better Tomorrow," encapsulates its dedication to making a positive impact on the environment and ensuring the secure and responsible disposal of electronic waste.

We pay for extensive training to make you a world class cyber security professional.

Please email Tanner at tcampbell@pjr.com for more info. ♦

PJR Supports The Lions To A Great Season!

LET'S GO LIONS!

PERRY JOHNSON REGISTRARS, INC.
Your Partner For Quality Certification

Mastering ISO 14001:2015 Certification With PJR

ISO 14001:2015 emphasizes strategic environmental management, leadership roles, proactive environmental initiatives, and lifecycle thinking for managing an organization's potential environmental impacts. This certification yields numerous benefits, including controls to support legal compliance and enhanced environmental performance. Advertising a voluntary certification to an **environmental management system standard like ISO 14001** can provide a competitive advantage over non-certified companies and represents a commitment to sustainability and conservation.

Perry Johnson Registrars (PJR) streamlines **the certification process** through extensive audits and assistance. This journey encompasses Stage 1 and Stage 2 audits for the initial certification, succeeded by ongoing surveillance and recertification audits. Additionally, PJR provides **complimentary webinars**, white papers, and an array of training resources at no added cost.

To prepare effectively for audits, organizations should ensure thorough documentation, staff training, and awareness programs are being implemented. Common pitfalls include **inadequate documentation**, lack of **management commitment**, and **overlooking lifecycle perspectives** in environmental impact assessments.

Maintaining compliance post-certification necessitates ongoing commitment, continual improvement, and periodic internal audits. Strategies include fostering a culture of environmental responsibility, staying updated with regulatory changes, and conducting regular assessments of environmental objectives.

PJR extends continuous support post-certification, aiding organizations in sustaining excellence by providing free resources, conducting training sessions, and offering expert guidance. Contact PJR's EHS Program Manager, Austin Matthews, for ongoing assistance at: amatthews@pjr.com.

The ISO 14001:2015 standard places emphasis on:

- **Leadership:** Assigning specific responsibilities for promoting environmental management within organizations' leadership roles.
- **Environmental Protection:** Encouraging proactive initiatives like pollution prevention, sustainable resource usage, climate change mitigation, and biodiversity protection.
- **Continual Improvement:** Focus on enhancing overall environmental performance rather than simply improving the management system.
- **Lifecycle Perspective:** Extending control over environmental impacts throughout a product's lifecycle, from raw material acquisition to disposal.

ISO 14001:2015 certification is a testament to an organization's commitment to environmental stewardship. PJR's expertise and comprehensive approach support organizations in navigating the certification process, maintaining compliance, and fostering sustained environmental excellence. ◆

ISO 14001:2015 Clause By Clause Training

PJR is thrilled to announce the launch of an exclusive educational initiative aimed at empowering organizations seeking ISO 14001:2015 certification. The free Clause-by-Clause Training Course, led by EHS Program Manager Austin Matthews, promises to be an invaluable resource for those navigating the certification journey.
