CE MARKING

PRESSURE VESSELS

Perry Johnson Registrars, Inc.

Your Solution for Product Certification.

Benefits of CE Marking

Of all the different product certifications available, why choose the CE Marking? To start, the CE mark is a seal of quality that assures consumers and others of a product's safety merits. In order to obtain the CE mark, a product must pass safety, health, and environmental tests to ensure that it is safe for consumers to use.

Also, any product imported into the European Union must have a CE mark. For large companies developing new products or smaller organizations looking to expand, the CE mark is a must for tapping the vast potential of the European Union Market. Also, with the CE mark, products do not need to be adapted to the specific requirements of the different member states of the EEA. The CE mark provides assurance to all these countries that a product is safe. This may also reduce damage and liability claims.

CE Marking: Simple Pressure Vessels

PJR and SZUTEST have joined together to provide CE marking for a wide range of products. One such class of products that SZUTEST is authorized to approve CE Marking for are Simple Pressure Vessels (87/404/EEC). This CE Marking will allow a company to distribute its products considered pressure vessels within the European Union, and objectively verify that the product is safe to use.

Is my Product Considered a Pressure Vessel?

A simple pressure vessel is defined as any welded vessel subjected to an internal gauge pressure greater than 0.5 bar (a unit of pressure) which is intended to contain air or nitrogen and which is not intended to be fired. The vessels must be manufactured in series production and be of welded steel or aluminum.

Pressure vessels are divided into categories based on their stored energy and is expressed in terms of the product of its maximum working pressures in bars and its capacity in liters. Class A consists of vessels whose stored energy is more than 50 bar*liters, and Class B consists of vessels whose stored energy is less than 50 bar*liters.

Pressure vessels cover a wide range of products, from refrigerator compressors and watches to boilers and air conditioners.

The CE certification process may sound daunting, but PJR and SZUTEST can greatly simplify this process. Please contact PJR today for more information about getting the CE mark on your pressure vessel.

History of PJR

Founded in 1994, Perry Johnson Registrars, Inc. is an industry leader in the Management Systems certification market. PJR is a full-service registrar that has offices in more than seven countries including: the U.S., Japan, Italy, Mexico, China, Thailand and India. PJR
