PERRY JOHNSON REGISTRARS, INC.

ISO/IEC 27001:2022 TRANSITION STRATEGY

MILESTONE	DATE/DEADLINE	NOTES
Publication of ISO/IEC 27001:2022	October 2022	
Last day for new certificates to be issued to ISO/IEC 27001:2013	30 April 2024	*New PJR clients can be certified to the 2013 version until this date.*
Last day for clients to complete their transition audit	1 July 2025	*This is an internal PJR deadline to ensure that we can provide the best customer service to our clients. If the audit is completed by this date, there is sufficient time for corrective action implementation, technical review and decision.*
End of transition period	31 October 2025	*ISO/IEC 27001:2013 certificates will be invalid as of this date.*

*Clients are encouraged to transition at their recertification audit. A 0.5 day of audit time is added to transition audits occurring at recertification. If clients transition at surveillance or a special audit, then 1.0 day must be added to the audit.

**Only clients that transition at a recertification audit will receive a new, three-year certificate. Clients transitioning at surveillance will have their current certificate revised to reflect the new standard and possibly an extended expiration date.
