

## AS9100 Revision

AS9100 is a set of quality management system requirements for aviation, space, and defense organizations. Within the next year, AS9100 will see big changes. The standard is undergoing a major transition in order to stay in line with the requirements of the ever-changing ISO 9001 standard, as well as the developing needs of the aerospace industry. The updated AS9100 standard will follow the 10-clause format of ISO 9001:2015, and features a wide range of changes, focusing on scope expansion, as well as risk, project, and configuration management.

With these changes, improvements are expected to be made in things like product safety, human factors, preventative action, counterfeit parts, product realization and planning, and more. The application of risk management.

ISO 9001:2015 is expected to be released soon, and once it is, there will be a three-year transition window for your organization to conform to the AS9100:2016 changes. Get a head start on the competition by contacting Perry Johnson Registrars for more information on the upcoming transition. Call us at 1-800-800-7910.
