

**FOR IMMEDIATE RELEASE**

**Perry Johnson Registrars, Inc. Achieves ANAB Accreditation for ISO/IEC 42001 Certification**

Perry Johnson Registrars, Inc. (PJR), a leading accredited certification body, is pleased to announce that it has been granted accreditation by the ANSI National Accreditation Board (ANAB) to provide accredited certification to **ISO/IEC 42001**, the international standard for Artificial Intelligence Management Systems (AIMS).

ISO/IEC 42001 is the world's first certifiable management system standard specifically designed for organizations that develop, provide, or use artificial intelligence systems. The standard establishes a structured framework for the responsible governance of AI, helping organizations address risks, improve transparency, support regulatory compliance, and promote the ethical development and deployment of AI technologies.

With ANAB accreditation, PJR is now authorized to perform accredited ISO/IEC 42001 certification audits, providing organizations with confidence that their AI management systems have been evaluated by a globally recognized and impartial certification body.

*"Earning ANAB accreditation for ISO/IEC 42001 is a milestone we are very proud of. AI governance is becoming increasingly important for organizations around the world, and we are excited to offer accredited certification services that help clients demonstrate responsible and trustworthy AI practices. This accreditation required a great deal of preparation, collaboration, and attention to detail. Proof that while AI may be able to automate many things, it still can't replace a dedicated accreditation team and knowledgeable auditors."*

— Shannon Craddock, PJR Programs & Accreditations Manager

Achieving ANAB accreditation for ISO/IEC 42001 reflects PJR's continued commitment to providing accredited certification services that help organizations build trust, demonstrate accountability, and strengthen AI governance. As artificial intelligence continues to reshape industries around the world, ISO/IEC 42001 provides organizations with a recognized framework for managing AI responsibly while supporting continual improvement and stakeholder confidence.

Organizations pursuing ISO/IEC 42001 certification can benefit from:

- Demonstrating responsible AI governance
- Strengthening risk management and oversight of AI systems
- Increasing stakeholder confidence through accredited certification
- Supporting compliance with emerging AI regulations and customer expectations
- Integrating AI governance into existing management systems

PJR has decades of experience providing accredited management system certification services across a broad range of international standards. The addition of ISO/IEC 42001 further expands PJR's ability to support organizations navigating rapidly evolving technologies and regulatory expectations.
