**WHY A PRE-ASSESSMENT/VPA IS IMPORTANT**

**WHAT IS A PRE-ASSESSMENT?**

A pre-assessment is not quite an “audit”; it is a broad overview of a quality system to determine how ready your company is for the actual registration audit process. The duration of the pre-assessment is usually traditionally about one to three days, depending on the size of your facility.

The purpose of the pre-assessment is to help reveal potential nonconformances that may arise later during the registration audit. Think of the pre-assessment as “dress rehearsal” or dry run, before registration. However, pre-assessments do not guarantee that all nonconformances will be uncovered.

During the pre-assessment, the PJR audit team will review your quality system to ensure that it meets the elements of the standard to which you are being audited (i.e., ISO 9001, AS9100C, etc.). If any major or minor nonconformances are discovered, they will be summarized on a Pre-Assessment Report, which also details the strengths of your management system. The auditor will also include if you are ready for the registration audit or not.

**BENEFITS OF PRE-ASSESSMENTS:**

- Identifies your quality system strengths and weaknesses
- Evaluates how your company’s current quality system stacks up against the standard
- Focuses your company’s attention on the areas that need strengthening
- Helps your company’s staff gain knowledge of the auditing process
- Aids your company in eliminating unnecessary preparations for the registration audit
- Increases your company’s probability of success
- Allows your company to gain experience in handling an audit and auditors
- Let’s your company gain an understanding of PJR’s audit team practices

**How is a “Virtual” Pre-Assessment Different?**

A Virtual Pre-Assessment (VPA) offers all the benefits of a conventional pre-assessment but with the added flexibility and savings of no travel costs. Your auditor will work within the technical parameters of your company to review all necessary areas via phone, document sharing, etc.

**WHAT TO EXPECT DURING YOUR PRE-ASSESSMENT:**

**OPENING MEETING**

PJR auditors will speak with your management team regarding the scope of the pre-assessment and answer any questions that arise.

**DOCUMENTATION REVIEW**

The audit team will review your procedures and documented quality system to measure compliance with the applicable standard.

**QUALITY SYSTEM ASSESSMENT**

The audit team will observe your facility, conduct interviews, request documents and examine equipment to measure compliance to the standard.

**CLOSING MEETING**

The audit team will present the findings both verbally and in a written report. A summary of strengths and actual/potential system nonconformities will be presented. Corrective action is not necessary for nonconformities uncovered during a pre-assessment.
