PERRY JOHNSON REGISTRARS · AUDITOR RECRUITMENT

Do You Want to Become an Auditor?

Aerospace · EHS · ISO 9001 · Specialist scopes

Ryan Brickner
Corporate Recruiter, Perry Johnson Registrars

PERRY JOHNSON REGISTRARS, INC.

TODAY'S CONVERSATION

Making auditor opportunities easier to understand

01

Standards we support

Aerospace, EHS, ISO 9001 and specialist scopes

02

Backgrounds that fit

Existing auditor credentials or strong industry experience

03

Your path into auditing

The right next step depends on your experience and each program's requirements

WHY AUDITING

Why consider third-party auditing?

Put years of technical or operational experience to work in a **different way**.

It suits people who enjoy learning how different organizations work. The role takes more than knowing a standard.

- **Good judgment**
- **Strong communication**
- **Attention to detail**
- **Findings backed by objective evidence**

FOCUS AREA · AEROSPACE

Aerospace is one of our main recruitment areas

AS9100

Aviation, space and defense manufacturers and service providers

AS9110

Maintenance, repair and overhaul (MRO) organizations

AS9120

Distributors

> We want to connect with professionals who have relevant work experience at aerospace, space and defense organizations.

FOCUS AREA · AEROSPACE

Two routes into aerospace auditing

ALREADY QUALIFIED

You have the required experience and qualifications

Contract auditor opportunities may be available.

BUILDING TOWARD IT

You have strong industry experience

We'll discuss whether an applicable training or development route is realistic.

Level 1 and Level 2 designations have specific program requirements, so we review each candidate individually.

FOCUS AREA · EHS

Environmental, health and safety auditing

ISO 14001

Environmental

- Environmental compliance
- Waste management
- Environmental programs
- Sustainability
- Related industrial responsibilities

ISO 45001

Occupational health and safety

- Safety professionals
- Hands-on experience within the last few years

For both: relevant full-time experience and the applicable auditor training and qualification requirements matter.

NEW TO AUDITING?

Have EHS experience but haven't audited before? We can train and qualify you to become a PJR lead auditor.

QUALITY MANAGEMENT SYSTEMS

ISO 9001: a broad standard used across many industries

4+

years of work experience required

The work often involves understanding:

- Processes
- Documented information
- Corrective action
- Customer requirements
- Continual improvement

BEYOND AEROSPACE, EHS AND ISO 9001

Other standards and specialist scopes

ISO 13485

Medical devices

ISO 27001

Information security / cybersecurity

Background in IT, cybersecurity, medical devices or more? Don’t assume your experience is unrelated.

These scopes require different technical knowledge and credentials. Tell us what you’ve done and we’ll see whether it aligns with current needs.

ACROSS EVERY STANDARD

What makes a strong auditor?

- Technical knowledge
- Communication
- Objectivity
- Writing ability
- Professionalism
- Willingness to keep learning
- Great personality
- Ability to travel to local and out-of-state clients

> Maintain impartiality and handle information professionally. Technical expertise matters, and so does explaining what the evidence shows.

GETTING STARTED

How to start the conversation

1

Share your resume and relevant certifications

2

We review your industry and audit experience and the standards that fit

3

Together, we discuss possible next steps

> Know someone who could be a fit? Feel free to pass along our contact information.

THANK YOU · QUESTIONS AND ANSWERS

Let’s talk about where your experience fits

Aerospace, EHS, Quality, IT, Medical Device or another specialty
